

1) Enterprise Asset Management

- AI powered insight
 - Planning
 - Maintenance
 - Performance
- * From Procurement to decommissioning

2) Mobile EAM

- Field techs
- Line techs and troubleshooters
- Possible notifications for real time outages?

3) Asset Performance Management

- Tracking asset age and likelihood of failure

4) Enhanced Oversight

- AI helps view field conditions
(Basically enhanced vision?)

APPLICATIONS (MANAGE)

Free trial Standard edition

1) Manage with Health

- Manage your asset lifecycle, workflow, and business processes and integrate with other enterprise applications.
- Dashboards to show key KPIs
 - Overdue emergencies
 - Current outages
 - Lots of room for customization of dashboards
 - Set targets for each metric for overview

2) Administration* Calendars (such as night shift calendar)

- Query Details (appears to be using SQL)
- Select : where statements in order to select data to be shown.
- Appears to be done automatically however more complicated queries likely.

* Resources

- Labor (a place to view every employee)
- Qualifications (a place to view groups of employees by qualification)
- Person Groups (groups like Safety / Engineering / HR)
- Crafts (Electricians, welders, fleet mechanics)
- Crew types (Facility Maintenance Crew)
- Crews (People : leader in charge of each crew)
- Work zones (PDTK, UCSC, East Service Center)
- Graphical Crew management (visually manage your crews)

* Bulletin Board

- Message IDs attached to a subject serving as sort of a notification center

* Classifications

- A sort of tagging / sorting system

* Service Address

- Addresses of services we provide it... FVA, CSU, Aurora

* KPI Manager

- A place to create and manage KPI's.

* Scheduler Administration

- Scheduling alternate resources
- Scheduler Data Manager

3) Analytics* Report viewer (View Reports)* KPI viewer (View KPIs)4) Assets

- * Assets (Conveyor Belts, Pumps, Tractors, buildings)
- * Asset Templates (good for creating repeating Assets)
- * Locations (body shop, iteration tanks)
- * Meters (Meters & their characteristics)

* Meter Groups (groups to organize meters by type, location, etc...)* Condition Monitoring (monitor pressure, temp, etc...)* Failure Codes (Failure codes for different assets)* Maximo Health (Shows health & overview of various assets)5) Contracts* Purchase Contracts (Place to manage all contracts ie... Electrical supplies 2 yr agreement)* Lease / Rental Contracts (ie... Server lease)* Labor Rate Contracts (outside labor contract)* Master Contract (Dell or HP contract)* Warranty Contracts (warranty to Dell or HP computers)* Terms and Conditions (terms and conditions for Dell or HP)6) Financial* Currency Codes (for out of country currency)* Exchange Rates (Exchange rates for currency)* Chart of Accounts (The place where the GL is stored)* Budget Monitoring (view and manage the budget)7) Inventory* Item Master (Every item in inventory)* Service Items (Freight, Telephone Bills)* Tools (Torch, Bandsaw, Punch)* Stocked Tools (tools in storage?)* Inventory (Gaskets, Pipes, Bolts)* Inventory Usage (Restock)* Shipment Receiving (Shipments received)* Condition Codes (?)* Storerooms (Central / Birdsall)* Count Books (?)8) Planning* Job Plans (Breaker Inspection, Create IT accounts)* Routes (Test route / quarterly pump service)* Safety

- Hazards
- Precautions
- Lock out / tag out
- Safety plans

9) Planning and Scheduling* Graphical Work Week* Graphical Scheduling* Graphical Scheduling (large projects)* Graphical Assignment* Graphical Assignment (repair facilities)* Graphical Crew Management* Graphical Appointment Book* Graphical Resource View10) Preventative Maintenance* Preventative Maintenance (Schedule of maintenance for assets)* Master PM11) Purchasing* Purchase Requisitions (submit purchase requisitions to be approved and tracked)* Purchase Orders (Approved Purchase Requisitions. ie... "spare parts replenishments")* Receiving (Shipments received with attached PO's)* Shipment Receiving (difference from receiving unclear)* Invoicing (A place to manage, create, and view invoices)* Request for Quotations (Quotes for projects / services)* Companies (Seems to be the same as a list of vendors)* Company Master (Full list and guide of all companies / vendors)* Terms and Conditions (Terms and conditions organized)12) Self Service* Role Based Applications

- Service Requests

13) Service Level Agreements* List of SLAs (every area has)* Service Groups (Fleet, troubleshooters, linemen)14) Platform Configuration* Platform Configuration

- Workflow Designer (Area to view, modify, or create new processes / flows.)

15) Work Orders* Work Orders (Maintenance Ford F-250, fix Water pump)* Work Order Tracking (Track progress & status of work orders)* Labor Reporting (Who and where work orders are assigned based on labor.)* Quick Reporting (Alternate view for work orders)* Assignment Manager (Assigning work orders to labor)* Role Based Applications

- Service Requests (a place to see service tickets)
